

# The Little Nut Tree Holiday Club

## Covid-19 Policy

The Little Nut Tree Holiday Club recognises that careful planning is essential in order to keep the children and our staff safe, and to limit the spread of coronavirus/Covid-19, within our setting. Accordingly, we have conducted a thorough Covid-19 **risk assessment** and will review it every half term whenever Government guidance changes.

### Covid-19 symptoms

Covid-19 is a viral, respiratory disease, which is spread from person to person by close contact. It typically causes fever and a dry cough, and in some cases may progress to viral pneumonia which cannot be treated by antibiotics. Symptoms of Covid-19 can include:

Continuous dry cough	Sore throat
Fever (high temperature)	Tiredness
Difficulty breathing	Loss of taste and smell

The initial symptoms are similar to colds and flu-type illnesses, but the combination of a recent onset of fever and a new continuous cough seem to be present in many cases of Covid-19. However, it is important to be aware that in some cases the symptoms may be very mild or even non-existent, especially in children.

### Procedure for infection or suspected infection

Any child who becomes ill with symptoms which could be Covid-19 while at the Club will be isolated from the other children by at least two metres until the child can be collected by his or her parents. If the child becomes seriously ill, we will call 999.

If a child or member of staff has suspected symptoms of Covid-19, they will be sent home and must follow the Government guidance for households with possible Covid-19 infection. This includes self-isolation and taking a Covid-19 test. See:

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection>

Most suspected cases of Covid-19 turn out to be negative, so the Club will remain open unless or until advised otherwise by the local Health Protection Team, but parents and staff will be informed, especially those in high-risk groups.

If children or staff experience any symptoms of Covid-19 they must not attend the Club until all symptoms have passed and they feel well.

### Infection control

Like the common cold and flu viruses, Covid-19 is spread by:

- Infected people passing the virus to others through large droplets when coughing, sneezing, or even talking within a close distance.
- Direct contact with an infected person: for example, if you shake or hold their hand, and then touch your own mouth, eyes or nose without first washing your hands.

- Touching objects (e.g., door handles, light switches) that have previously been touched by an infected person, then touching your own mouth, eyes or nose without first washing your hands. Viruses can survive longer on hard surfaces than on soft or absorbent surfaces.

We will take the following steps to reduce the risk of catching or spreading Covid-19 at the Club:

#### ***Hygiene:***

- Staff and children will wash their hands as soon as they arrive at the Club, and will be reminded to wash their hands regularly throughout the session, especially after using the toilet, before eating food and after coughing or sneezing.
- Hand sanitiser will be available in convenient locations throughout the club.
- We will have tissues readily available for use when sneezing and coughing, and these will be disposed of, in a lidded bin, immediately after use.
- If they don't have a tissue to hand, children will be instructed to cough or sneeze into the crook of their arm.
- We will discourage children from touching their faces.
- We will discourage children from touching each other.

#### ***Cleaning:***

- We will ensure that frequently-touched surfaces, such as handles, door plates, light switches, table tops and toys are regularly cleaned with anti-bacterial spray or wipes, before, during and after each session.
- We will remove toys that are difficult to clean.
- We will remove soft toys and soft furnishings, such as cushions and rugs.
- We will restrict the sharing of toys and equipment between groups as much as possible. Any toys or equipment that need to be shared will be thoroughly cleaned before being used by the next group.
- Toilets and sinks will be cleaned before and after each session, and also while the club is in operation.

#### ***Premises***

- Doors and windows will be kept open where safe to do so, to keep the premises well ventilated.

#### **Promoting good practice**

We will promote infection control through the methods above, and in addition we will:

- Ensure that all staff have received training in, and understand, our new procedures
- Display posters and information to promote infection control
- Ensure that adequate supplies of cleaning materials are available within the Club
- Dispose of waste promptly and hygienically
- Provide tissues and suitable facilities for their disposal.

## Closure

The latest advice is that closing individual settings is of limited benefit in stopping the spread of the disease. However, there may be some occasions when we will have to consider temporarily closing the Club because we have too few unaffected staff to run sessions safely. If this occurs the manager will contact OFSTED for further support and guidance.

The Club will also have to close if advised to do so by the local authority in the interest of safeguarding the children in our care.

In the event of closure, the manager will notify parents or carers as soon as possible. The manager will also inform OFSTED as well as other relevant parties, e.g., feeder schools, other users of shared premises, etc.
